

Ortho-Access

ORTHOPAEDIC IMAGING SYSTEM

Image access for the Orthopaedic Surgeon

Ortho-Access is an integrated system of imaging tools essential for the Orthopaedic Surgeon working in the digital environment.

Combining the functionality and power of:

iQ-VIEW Interfaces with PACS or network data systems to facilitate access to diagnostic images within a digital environment and can launch OrthoView and TLA Generator

OrthoView Planning & templating solution for joint replacement, trauma, pediatrics & osteotomy

True Life Anatomy* TLA Generator creates 3D models from CT/MRI data and is part of a comprehensive set of medical visualization and analysis software tools
